# release notes

**pandemica**
second wave

## responsive website

- Now with full support for mobile device scaling.

- Custom styles and functionality for worker dashboards.

- Small tweaks to color and usability.

## smart services

- **Second Wave** intelligently switches requests from different servers.

- What this means is, if the reports service fails, you can keep managing your health center. Every part of the plaform lives on its own bubble!
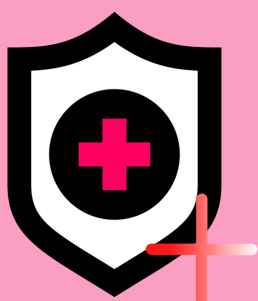

## optimized database

- Your data is very important to us. That's why we implemented a multiple cloud database solution.

- In combination with **Smart Services**, we automatically store data securely, exactly where it needs to go. This creates a more seamless experience.

## new dynamic tables

*medication of patient Steve Jobs*

| name | pharmacy |
| --- | --- |
| Nixen | Farmas |

add new

- New **Dynamic Tables** support changes without reloading.

- Automatic data field fill when editing.

- Improved alert system shows you if things go right or wrong.

## introducing health center+

- Exclusive health center+ management features: Lounges, Equipment, Beds, Procedures & Health Workers

- Upgrade contacts to patients with one click.

- New doctor dashboard for individual patient management.

- Individual patient accounts for information check and reservation request.

- New anonymous feedback report for quality control.

- Features **Smart Services** and **Optimized Database**.

*initial rollout in Costa Rica
